The past is a fascinating place! Who'd have thought I'd end up in the Age of the Dinosaurs? I want you all to join me in the Time Trekker 3000 to make an in-depth study of dinosaur behaviour! Here are some of the creatures we might meet along the way...

## PTERANODON

Pteranodon Cove HQ

Name: **Pteranodon**

This flying dinosaur is really cool! It lived about 150 million years ago, and it loves to eat fish, just like us penguins.

## TYRANNOSAURUS REX

This sharp-toothed beast is the king of the dinosaurs! Just don't tell him how small his brain is... he's rather sensitive!

# PLANET

All about wild animals and caring for our world.

G'day, nature fans! Today we're looking at some of the most amazing creatures in the ocean ... whales!

Name:

## Humpback whale

These whales love a lot of underwater karaoke! They communicate by singing songs to each other. They are great swimmers too. Sometimes you can see them leap out of the water, the sea is breathing.

## Creature Close-up

Name:

## Beluga Whale

Also called white whales, these are one of the smallest (and cutest) of all whale species! They swim around in groups called pods, and you can recognise them by their strange rounded foreheads.

## King of the Deep

25 African elephants

18 double decker buses

45,000 Rockhopper penguins

## Whale-y Cool Facts

A baby blue whale grows 4.5kg every hour

Whales are mammals, just like Polar bears

Humpback whales can migrate over 5,000 miles to feed

Sperm whales and hippos are also relatives of the whale

## Conservation

A long time ago, some whale species were hunted almost to extinction. Today there is an International ban on whaling, but a few countries still hunt whales. Many organisations are campaigning for a total ban to ensure these amazing animals are safe for the future.
